

OUR FAMILY includes girls and boys of all ages in a permanent home environment with access to all levels of education, medical & psychological attention, recreation and english language training.

OUR GOAL is to expand & enhance our physical environment in order to assist more girls and boys and facilitate their healing, learning and development onsite.

OUR APPROACH involves building self-esteem through moral, academic & emotional support in a permanent family environment.

OUR MISSION is to create strong, independent, successful young women and men - active members of society - by building a sense of permanence & enlightenment in their home environment while providing access to post-secondary training/education and the love & support required to succeed socially, academically and spiritually, hence changing the cycle.

Be part of the change!

Fundación Corazón

We are a registered non-profit association dedicated to providing a safe, loving home environment for girls and boys rescued from high risk situations including abuse, abandonment and exploitation. We are able to provide tax receipts for Canadian, Mexican and US Citizens.

We are growing rapidly... and continue to be the largest government approved home for boys and girls of all ages in the entire Bahía de Banderas area covering two States (Jalisco & Nayarit). With tourism as the main industry in the area, child exploitation & prostitution are rampant, causing government agencies and individuals to look to us for assistance. In March, 2012 we opened our door to the first girl.

Our current population of 85 includes an age range of 3 to 22, including 12 sets of siblings and four young people with disabilities. All attend school, english classes and counseling, participate in cooking meals, housework and sports. An overwhelming sense of joy and pride in their new home and life is evident in their eyes and their smiles, heard in their laughter and song... childhoods Reclaimed!
